

Excellent Brit-pop from a Greek band that was originally formed in Birmingham back in 2001. Their fresh sound is perfectly blended of the sunny era of the mid to late 80's British indie legends, such as Smiths, New Order, Happy Mondays, Inspiral Carpets among others. They have supported so far Six By Seven, Electrelane, Saint Etienne and Ladytron, leaving the best impressions with their performance. "Underground" is now getting a remarkable airplay in Athens and Thessaloniki radio shows. A very promising "blast off" from a very promising young band.
